

SAFETY SERIES

ADVANCING ENERGY STORAGE SAFETY PRACTICES

Join first responders, local officials, developers, manufacturers, financiers, and insurance stakeholders for tailored educational safety workshops to share risks, best practices, emerging challenges, and potential solutions surrounding energy storage deployment.

CESA's Safety Series will advance and educate a coalition of stakeholders representing jurisdictions across the U.S. West on energy storage safety practices, while focusing on national standards, site considerations, insurance and other factors.

ABOUT CESA

California Energy Storage Alliance (CESA) is on a mission to make energy storage a mainstream resource. At 100+ members strong, CESA is committed to advancing a more affordable, efficient, reliable, safe and sustainable electric power system for all Californians.
